FOR IMMEDIATE RELEASE

July 15, 2015

NJ Tech Council, BioPharma Research Council, & BellWorks Collaborate:

D3D: Data, Drugs, & Diagnostics
August 12, BellWorks, Holmdel NJ

(Tinton Falls, NJ) D3D: Data, Drugs, & Diagnostics (Wednesday, August 12, 2015) brings together researchers, drug development professionals, and device inventors to address data's role throughout the discovery to development process.

A collaboration between the New Jersey Tech Council, the BioPharma Research Council, and BellWorks (at the former Bell Labs site in Holmdel, NJ) D3D will explore data capture, analysis, sharing, and leveraging in biomedical research and point of care diagnostics.

"This year we have been working with the crossover cohort of research scientists and engineers, and the IT professionals who bring key innovation to their work," say Joanne Gere, Executive Director of the BioPharma Research Council (BRC). "By partnering with the New Jersey Tech Council, we celebrate the convergence of biological and data research that has created a revolution in healthcare."

NJ Tech Council EVP Paul Frank adds, "Our member companies impact life science discovery and development across the region. Working with the BRC, and BellWorks, we can stimulate communication across functional silos by addressing data generation, collection, analysis, storage, and sharing specific to the biomedical development process."

About the Organizers:

The BioPharma Research Council (BRC) is a nonprofit association for scientists in industry, academic, nonprofit, government, and supplier labs and their teams. www.biopharmaresearchcouncil.org

The New Jersey Tech Council is dedicated to helping its members grow while supporting and nurturing the tech, innovation, and entrepreneurial ecosystems. www.njtc.org

BellWorks, designed by the legendary Eero Saarinen, began its life as Bell Labs, the iconic epicenter of discovery. Today, the site brings together a rich and diverse community, blurring the line between work and play, past and future, imagination and reality. bell.works
